MISSION - MULBERRY HOUSE

We strive to produce "best in class" audio-visual learning resources for health and social care providers.

Our focus is to promote best practice by engaging the learner's interest in the learning resource so as to actively encourage the learner to develop their skills and, vitally, for the learner to feel motivated to put those skills into practice.

Thus, individuals receiving a health or social care service, some of the most vulnerable people in our society, are more likely to have their well being promoted and their best interests served as a result of Mulberry House learning resources.

"promote best practice by engaging the learner's interest in the learning resource"
