VALUES - MULBERRY HOUSE

Through active participation and engagement with stakeholders within health and social care, embracing new technology with interest and enthusiasm, we can put into every day practice the values of relevance, quality, affordability and on-demand delivery.

Planning, organising, monitoring, control, review and response all reflect a disciplined and experienced approach to how Mulberry House conducts its affairs.

Such an approach is a result of resourceful business practice, a willingness to question, listen and reflect. Careful recruitment, a pleasant working environment, providing the right tools for the job, support and encouragement contribute to an environment where our employees naturally adopt a "right first time" attitude.

This "in-builds" honesty, reliability and integrity, from which naturally flow responsibility and accountability. All of which contribute to and feed our moral and ethical business platform.

"embracing new technology
with interest and
enthusiasm"
