

## Brushing Someone's Hair

- Follow infection control procedures
- Wear appropriate protective equipment
  
- Make sure you use the client's own brush/comb to prevent cross contamination
- Is the brush/comb clean?
- Start at the end of the hair, gently working upwards towards the scalp easing out any tangles.
- Be careful not to pull the person's hair, take your time
- Brush and style their hair the way they like it done
- Use any gel, mousse, spray etc. that they prefer
- Give the client a mirror to check they are happy
- Clean the brush/comb before putting it away
