

Shaving Someone's Legs

- Follow infection control procedures
- Wear appropriate protective equipment, especially gloves
- Place a towel under the client's leg
- Raise the part of the leg to be shaved and wash it with warm water
- Apply some lather - soap, shaving foam etc. to lubricate the area to be shaved
- Moving the razor upwards from the ankle to the knee, carefully shave
- Rinse the area
- Dab it gently with a clean towel to dry the area
- Repeat for the other leg
